

## LOUPES

*Hint: Always buy the best you can afford*

*Do you buy inexpensive inferior-quality eyeglasses because they less expensive than the ones offering optimal vision?*

- Big round glass ala Sherlock Holmes
- Cup loupe
  - Put large open end over your eye and bring the object to your eye until it is in focus
- 10X fully corrected lens
  - Magnifies object 10 times
  - Optical glass
  - Fully corrected for depth distortion and color perception
